

ALASKAN BREWING

5429 Shaune Dr, Juneau, AK www.alaskanbrewing.com

Opening in 1986, the Alaskan Brewing Co. became the 67th operating brewery in the USA and the only one in Alaska at that time. Accessible only by boat or plane, our brewery is located in Juneau and is surrounded by 1,500 square miles of ice fields. That is why our beer tastes so crisp, clean and delicious!

HOPOTHERMIA: A full-flavored representation of the Double IPA style with a robust malt body resting in easy harmony with the big and drinkable American hop flavor. OG: 1.076 ABV: 8.5% IBU:70

FREERIDE APA: A floral, fruity and citrusy American Pale Ale that showcases the aroma and flavors of Citra, Centennial and Cascade hops with just enough malt backing to balance. Freeride features a lush green and almost tropical hop aroma paired with the unique taste combination of these three distinctive hop varieties, making it both full of flavor and crisply thirst-quenching. OG: 1.047 ABV: 5.3% IBU: 40
